by the Alabama State Board of Chiropractic Examiners.
The required 2 hours of “Rules/Regs” CE are available online; see www.dconline.org for more information.

About The Seminar
“Chiropractic Research: The Year In Review” provides an interactive review of the most interesting and clinically useful chiropractic-related research published in the last year. Drawing from research from all professions (DC, PT, DO, MD, etc.), the selected articles have been included for review because of their clinical relevance to the practicing chiropractor. Reflecting the variety of conditions that present in the chiropractic office, the broad range of research covered by this seminar will help you:

● Enhance your practice with new tx techniques.
● Stay abreast of the latest advances in conservative neuromusculoskeletal care.
● Be aware of the benefits and shortcomings of alternative interventions.
● Expand the scope of your current practice.
● Treat your patients with greater confidence and enthusiasm.
● Put to use the latest proof of chiropractic’s effectiveness.
